## PROFESSIONAL EXPERIENCE

### **JUNIOR EXPERT IN POLICY EVALUATION** **EUTALIA SRL**

**Apr 2023 - Dec 2023**

During my professional experience in research and evaluation of interventions in the context of Action I.2 - Mobility and Attractiveness I acquired valuable skills in data collection and analysis using a range of research methods. Under the guidance of the project director, I worked closely with a team of junior and senior experts. Through active participation in discussions and knowledge sharing, this collaborative environment allowed me to develop my critical analysis and problem-solving skills. In addition, working with experienced professionals provided me with invaluable mentorship and guidance that fostered my professional growth and development. This allowed me to utilize my skills in analyzing data, drawing meaningful conclusions, and making informed recommendations. I gained a deep appreciation for the importance of evidence-based decision making in policy formulation and implementation through this role. Overall, this experience provided me with diverse skills and enhanced critical analysis abilities. I am eager to build on these experiences and continue to contribute to the evaluation of impactful policies and to drive positive change.

---

### **RESEARCH SCHOLAR IN ECONOMETRICS** **UNIVERSITY OF MOLISE**

**Aug 2023 - Present**

During my tenure as a Research Scholar within the Food Insecurity Trends project, part of the collaborative research partnership between the Department of Economics and the International Center for Tropical Agriculture (CIAT), under the leadership of Professor Giuliano Resce, I assumed the role of collecting and validating data from a variety of sources.

My primary responsibilities revolved around the application of advanced econometric analysis techniques to gather, categorize, evaluate, and monitor data from diverse external sources, with a notable emphasis on utilizing datasets from the World Bank. This dedicated effort made a significant impact by enhancing the understanding of the national and local contexts related to climate crisis issues.

In addition, this experience afforded me the opportunity to make substantial contributions, including:

1. Employing robust econometric methodologies to analyze data, yielding valuable insights that facilitated evidence-based decision-making.
  2. Collaborating extensively with cross-disciplinary teams to seamlessly integrate economic research on climate change into CIAT's overarching framework.
  3. Leveraging external data sources to provide comprehensive information and diverse perspectives on climate crisis concerns.
  4. Working diligently to establish a long-term vision for formulating focused and impactful research inquiries, addressing vital themes such as factors contributing to food insecurity, shocks, and hazards. These efforts significantly advanced scientific knowledge in this field.

## PROFESSIONAL EXPERIENCE

### VISITING STUDENT

Jan 2024 - Present

**UPV Universitat Politècnica de València**

Through the enriching experience of my visiting period at UPV Universitat Politècnica de València, working closely with Prof. Josep Domenech, I gained profound insights into the intricacies of digital economics, innovation economics, and web scraping. This opportunity provided me with a hands-on understanding of the transformative impact of technology on economic systems and equipped me with practical skills in data collection and analysis through web scraping techniques. Collaborating with Prof. Domenech not only broadened my academic horizons but also honed my research methodologies and analytical abilities. The invitation to contribute to research projects at UPV underscored the recognition of my expertise in the field, reaffirming the value of my contributions to the academic community. This experience not only deepened my passion for interdisciplinary research but also cultivated a lasting appreciation for collaborative and mentorship-based learning environments. The invitation itself stands as a testament to the significance of my contributions and the meaningful impact of our collaborative efforts on advancing knowledge in digital and innovation economics.

### **International School for Advanced Training - Impact Evaluation of Development Policies Organized by The Italian Centre for International Development (ICID) in Collaboration with Center for Economic and International Studies (CEIS) of the University of Rome Tor Vergata, the Department of Social Sciences and Economics of Sapienza University of Rome, the Department of Economics of Roma Tre University, and the International Fund for Agriculture Development (IFAD)**

Participating in this highly specialized program, meticulously designed within the framework of the International School for Advanced Training, delved deeply into the field of development and public policy evaluation. The primary objective of this program was to equip participants with the key skills and competencies necessary to perform impact evaluations of development policies and programs. Emphasizing real-world case studies and the latest analytical techniques led to this achievement. Participants analyzed the intricate policy framework, including the objectives of policymakers, the program's beneficiaries, and the contextual factors that impact policy results.

The program provided a thorough examination of the essential instruments for assessing policy impact, with a specific focus on the expertise required to choose the most applicable tools tailored to each circumstance, as well as their proficient utilization. Ultimately, the program offered actual examples of the ideas and methods deliberated on. Interactive, hands-on exercises were conducted to enable the practical application of policy impact assessment. This segment covered a comprehensive range of evaluation exercises, including identifying essential data sources and collection techniques, software utilization, and proficiently handling significant statistical packages.

Participating in this international institute provided me with an unparalleled opportunity to not only advance my theoretical understanding of impact assessment but also cultivate practical skills that are crucial in the field of public policy analysis and development. The knowledge and skills gained from this program continue to enhance my work in policy evaluation.
