

# CURRICULUM VITAE

**SURNAME:** GERMANO

**NAME:** ROBERTO

**BIRTHDATE :**

**PLACE OF BIRTH:**

**RESIDENCE:**

**MARITAL STATUS:**

**WORK PLACE/POSITION:** **CHIEF EXECUTIVE OFFICER OF PROMETE SRL - CNR SPIN OFF COMPANY AND REGIONAL RESEARCH CENTRE FOR EXPERIMENTAL RESEARCH AND DEVELOPMENT IN THE FIELD OF PHYSICS QUALITY ASSURED FIRM - ISO 9001**  
[www.promete.it](http://www.promete.it)  
45 V. Tecchio, Sq., 80125 Naples, Italy  
Mob: +39 349 784 82 06  
E-mail: [germano@promete.it](mailto:germano@promete.it)

## ACADEMIC EDUCATION AND WORK EXPERIENCE

- since 1997 Chief Executive Officer of PROMETE Srl – CNR\_INFM Spin off Company and Regional Research Centre for Experimental Research and Development in the Field of Physics
- 2021 Lecturer for **MASTER UNIVERSITY OF FIRST LEVEL "QUANTUM MEDICINE AND BIORESONANCE" UNITELMASAPIENZA University of Rome** *The Master proposes to offer a systematic treatment of the possibilities of integrating conventional medicine with notions, procedures and instruments deriving from the modern **Quantum Physics**, in a holistic vision of the themes concerning health and wellness*, lecturer of the Module: "**Water, this unknown**". The Master - the first of its kind to address this innovative topic - will be available in 7 languages, Italian, English, Russian, Chinese, Spanish, German, and Slovenian, in 90 countries around the world.
- 2021 Lecturer for **MASTER OF FIRST LEVEL "ECOLOGY APPLIED TO SALUTOGENESIS" UNIVERSITY OF MOLISE** Interrelation between the health of the environment and the salutogenesis of man, acquisition of new skills in the field of green economy and circular economy, lecturer of the Module: "**Elements of classical physics and quantum mechanics applied to cell biology and dynamics of the living in relation to the environment**". a.a. 2021/2022
- 2010 Lecturer for the **Italian National Agency for New Technologies, Energy and Sustainable Economic Development (ENEA) Post Doc courses** regarding **INNOVATION & TECHNOLOGY TRANSFER** for high qualified researchers

in the area of *Management, programming, strategies and organization of industrial research projects*

- 2009 Lecturer for the **Italian National Agency for New Technologies, Energy and Sustainable Economic Development (ENEA) Post Doc courses** regarding INNOVATION & TECHNOLOGY TRANSFER for high qualified researchers in the area of *Techniques and processes software for medical diagnostic-functional imaging*
- 2009 Founder of NOI Association – NAPOLI OPEN INNOVATION  
[www.napolionopeninnovation.it](http://www.napolionopeninnovation.it)
- 2009 Founder and advisor of the Italian national magazine “TRASFERIMENTO TECNOLOGICO” (Technology Transfer) [www.trasferimentotecnologico.it](http://www.trasferimentotecnologico.it)
- 1998– 2000 Research contract with the National Institute for the Physics of Matter (INFM) Naples Research Unit, Physical Sciences Department, “Federico II” University of Naples, Italy: “*Production of magnetoelastic ribbons and their applications*”
- 1997 Research contract with the National Institute for the Physics of Matter (INFM) Naples Research Unit, Physical Sciences Department, “Federico II” University of Naples, Italy: “*Production of magnetoelastic sensors to measure displacements, vibrations and flows*”
- 1997 Founder of PROMETE, consultancy and research company for Innovation and Technology Transfer (in 1999 PROMETE has become one of the first Italian officially recognized Research Spin off and the first one in Campania Region)  
[www.promete.it](http://www.promete.it)
- 1997 Founder of the cultural association ALTANUR - Le Connessioni Inattese (The Unexpected Connections) [www.leconnessioniinattese.com](http://www.leconnessioniinattese.com)
- 1996–1997 Research contract with the National Institute for the Physics of Matter (INFM) Naples Research Unit, Physical Sciences Department, “Federico II” University of Naples, Italy in the frame of the European BRITE-EURAM III Project MADAVIC (*Magnetostrictive Actuators for Damage Analysis and VIbration Control*)
- 1996 Research contract with the National Institute for the Physics of Matter (INFM) Naples Research Unit, Physical Sciences Department, “Federico II” University of Naples, Italy: “*Development of magnetoelastic sensors to be employed in scientific apparatuses for magnetostriction and magnetic field measurements*”
- 1995-1996 Research contract for a joined project between R&D Division of Alfa Romeo Avio SpA and Magnetism Group of the Physical Sciences Department, “Federico II” University of Naples, Italy for the development of an *Air Mass Flow Prototype Sensor based on Magnetoelastic Waves*.
- June 1995 **M. Sc. in Physics (Condensed Matter Physics)**, Faculty of Physics, “Federico II” University of Naples, Italy

## **RESEARCH GRANTS AND AWARDS**

2004 – “*Roberto Marrama*” Prize for Young Innovative Entrepreneurs in Southern Italy.

1997 – Young Scientist Grant from the *8<sup>th</sup> International Symposium on Non-Linear Electromagnetic Systems (ISEM)*, Braunschweig (Germany).

1995 – Research Grant from the National Group of Structure of Matter for the National School in S. Agnello di Sorrento (Italy): *New developments and applications of magnetism*.

1993 – Research Grant from the National Group of the Structure of Matter for the National School in Rimini (Italy): *Nanostructured Materials - properties and applications*.

## **STUDENTS SUPERVISION**

### **M. Sc. Thesis Advisor**

2006 - M. Sc. thesis in Mechanical Engineering, “Federico II” University of Naples  
Domenico Cirillo

“Experimental realization and calorimetric characterization of an electrolytic confined plasma”

2004 - M. Sc. Thesis in Management Engineering, “Federico II” University of Naples  
Claudio Miccoli  
“Feasibility study for an Electromagnetic Field measurement service”

### **Stage Coordinator**

2006 – 2007:

Physics M. Sc. Mariella Cozzolino

Physics M. Sc. Fabiana Tulino

Physics M. Sc. Paola Maria Frallicciardi

Formation stage for Manager of Innovation coordinated by Campania Regional Center of Competency for New Technologies for Productive Activities

2004 – 2005:

Physics Ph. D. Emiliano Di Gennaro

Formation stage for Manager of Innovation coordinated by Campania Regional Center of Competency for New Technologies for Productive Activities

## **MEMBERSHIPS**

- Former Board of Experts of Technology Transfer of the Italian Ministry of the Economic Development
- Former Board of Experts of Campania Region for Research and Technology Transfer
- Former Advisor of the Italian magazine “Trasferimento Tecnologico” (Technology Transfer)
- Former Member of the International Society for Condensed Matter Nuclear Science – ISCMNS
- Former Member of the Board of Directors and of the Technical-Scientific Committee of the Italian Consortium for Earth Observations (CosOT, Consorzio Osservazioni Terra)
- Former Board of Directors of the Cultural Association “Campania Start-Up”
- Former Technical-Scientific Committee of “Napoli Open Innovation” Association

- Scientific Committee of ICMAST- International Conference for Materials and Applications for Sensors and Transducers
- Board of Directors of the Cultural Association ALTANUR – Le Connessioni Inattese
- President of the Cultural Association ALTANUR – Le Connessioni Inattese
- Board of Directors of the Cultural Association ALTERLAB
- Technical-Scientific Committee of “Diogene” Publisher for its Technology Transfer series.
- Scientific Committee of the AQUAPHOTOMICS International Symposium.
- Board of Directors of the MEDHYDRO Srl\_ “Vanvitelli” University Spin off.

### ***LANGUAGE SKILLS***

- ITALIAN – NATIVE
- ENGLISH – FLUENT  
1995 Diploma of Advanced English from “New School of English”, Cambridge, UK
- FRENCH – BASIC
- ROMANIAN – BASIC
- ANCIENT LATIN – BASIC

### ***SPARE TIME INTERESTS***

- Organization of popular science events. In particular, I am the initiator and the main organizer of “The Unexpected Connections” [www.leconnessioniinattese.com](http://www.leconnessioniinattese.com) that is an annual Interdisciplinary Conference held in Naples at the Italian Institute for Philosophical Studies <http://www.iisf.it>, one of the most prestigious Italian and European cultural centre. It is an annual appointment that starts with a one day conference and continues for some weeks with art exhibitions, theatrical performances, literary and artistic contests, etc. The aim of this popular event is to underline unpredicted connections among different fields of knowledge, to throw a bridge among experts in different fields, to reduce the gap between “humanistic” and “scientific” knowledge, to promote an overall view of the world.
- Reading books and papers on philosophy and history of science, and ethics in science.

### ***EXPERTISE IN***

- AMORPHOUS FERROMAGNETIC ALLOYS, MAGNETO-ELASTICITY, AND APPLICATIONS
- LECS – LOW ENERGY COHERENT SYSTEMS (QUANTUM ELECTRO DYNAMICS AND ITS MACROSCOPIC EFFECTS)
- TECHNOLOGY-TRANSFER, RESEARCH PROJECT FUNDING AND MANAGEMENT
  - ✓ innovation and technology-transfer (TT) consulting activities for companies and public research institutions;
  - ✓ scientific and technical assistance to private companies and public institutions for the preparation of industry-academia joint research project proposals in the frame of European Research and Development (R&D) programs, governmental and regional funding programs, etc;
  - ✓ management and result valorisation of TT and R&D projects financed by national and international programmes;
  - ✓ research cooperation agreements between private companies and public research institutions;
  - ✓ development of feasibility studies, market analysis and business plans for innovative start-ups;

- ✓ disseminate knowledge, technology-transfer information and promote innovation through public presentations, articles in various national and international publications, organization of public events and brainstorming meetings.

## ***PEER-REVIEWED INTERNATIONAL RESEARCH PAPERS (H-INDEX = 14)***

1. V. Elia, E. Napoli, R. Germano, D. Naviglio, M. Ciaravolo, G. Dal Poggetto, D. Caputo, R. Oliva, T. A. Yinnon, New physicochemical properties of liquid water resulting from recurrent contact with hydrophilic polymers. Characteristics of the resulting supramolecular aggregates: the Xerosydryle, *WATER*, 12, 72-85 (2022) DOI: 10.14294/WATER.2021.2
2. V. Elia, E. Napoli, R. Germano, D. Naviglio, M. Ciaravolo, G. Dal Poggetto, D. Caputo, R. Oliva, T. A. Yinnon, A study on the changes in physical properties of distilled water put in contact with porous hydrophilic materials: experimental evidences on Neapolitan Yellow Tuff, submitted to *Journal of Thermal Analysis and Calorimetry*
3. C. Dal Lin, R. Grasso, A. Scordino, A. Triglia, F. Tona, S. Iliceto, G. Vitiello, V. Elia, E. Napoli, R. Germano, F. Musumeci, Electric conductivity and delayed luminescence changes in human sera of subjects undergoing the Relaxation Response: a pilot study, *Organisms. Journal of Biological Sciences*, 4, (2), 17-29 (2021) DOI: 10.13133/2532-5876/16997
4. R. Campanile, E. Scardapane, A. Forente, C. Granata, R. Germano, R. Di Girolamo, A. Minopoli, R. Velotta, B. Della Ventura, V. Iannotti, Core-shell Magnetic Nanoparticles for highly sensitive Magnetoelastic Immunosensor, *Nanomaterials*, 10, 1526 (2020)
5. V. Elia, E. Napoli, R. Germano, V. Roviello, R. Oliva, M. Niccoli, A. Amoresano, M. Toscanesi, M. Trifuoggi, A. Fabozzi, T. A. Yinnon, Water perturbed by Cellophane: Comparison of its physicochemical properties with those of water perturbed with cotton wool or Nafion, *Journal of Thermal Analysis and Calorimetry*, <https://doi.org/10.1007/s10973-020-10185-0> (2020)
6. V. Elia, E. Napoli, R. Germano, R. Oliva, V. Roviello, M. Niccoli, A. Amoresano, D. Naviglio, M. Ciaravolo, M. Trifuoggi, T. A. Yinnon, New chemical-physical properties of water after iterative procedure using hydrophilic polymers: the case of paper filter, *Journal of Molecular Liquids*, 296, 111808 (2019)
7. P. Signanini, G. Vessia, V. Elia, E. Napoli, R. Germano, A study on the changes in physical properties of demineralized water put in contact with porous hydrophilic materials: experimental evidences on metabrick material, *Journal of Porous Media*, 22 (12), 1609-1625 (2019)
8. C. Verzegnassi, R. Germano, Magnetic effects on the polarization parameters of free electrons in quantum field theory, *WATER*, 11, 14-21 (2019)

### **PARTICIPATIONS TO INTERNATIONAL CONFERENCES**

- 24-27 October 2019, Bad Soden (Germany): 14<sup>th</sup> Annual Conference on the Physics, Chemistry & Biology of Water (invited)
- 18-21 October 2018, Sofia (Bulgaria): 13<sup>th</sup> Annual Conference on the Physics, Chemistry & Biology of Water.
- 6-9 October 2016 – Sofia (Bulgaria): 11<sup>th</sup> Annual Conference on the Physics, Chemistry & Biology of Water (speaker).
- 1-4 October 2015 – Varna (Bulgaria): 10<sup>th</sup> Annual Conference on the Physics, Chemistry & Biology of Water.
- 9-12 October 2014 – Pamporovo (Bulgaria): 9<sup>th</sup> Annual Conference on the Physics, Chemistry & Biology of Water (invited).
- 24-28 May 2012 – Budapest (Hungary): ICMAST 2012 - International Conference for Materials and Applications for Sensors and Transducers (Scientific Committee Member, Chairman and Organizer of the Session: LECS\_Low Energy Coherent Systems) (speaker)
- 20-23 October 2011 - Mount Snow, Vermont (USA): 6<sup>th</sup> Annual Conference on the Physics, Chemistry & Biology of Water.
- 13-17 May 2011 - Kos (Greece): ICMAST 2011 - International Conference for Materials and Applications for Sensors and Transducers (Scientific Committee Member, Chairman and Organizer of the Session: LECS\_Low Energy Coherent Systems, and Invited).
- 14-15 May 2010 - Milano (Italy): XXV Conference A.I.O.T. of Biological Medicine: “New Horizons in Medicine” (invited), at the Milan University.
- 15-17 May 2008 - Naples (Italy): Science and Democracy 4 (invited) at the Italian Institute for Philosophical Studies.
- 20-22 October 2006 - Naples (Italy): Science and Democracy 3 (invited) at the Italian Institute for Philosophical Studies.
- 22-25 February 2006 – Benevento (Italy): 5<sup>th</sup> ICEMS International workshop, Precautionary EMF Approach: rationale, legislation and implementation.
- 29 September 2004 - Roma (Italy): Forum Invest Economic Summit in Rome - The Italian-Romanian Partnership Contributing to Europe.
- 11-12 March 2004 - Brussels (Belgium): 3<sup>rd</sup> European Business Summit: «Research and innovation: A European strategy for more growth and jobs».
- 27 July – 1 August 2003 - Roma (Italy): 16<sup>th</sup> International Conference on Magnetism (ICM).
- 12-14 June 2003 - Naples (Italy): Science and Democracy 2 (invited) at the Italian Institute for Philosophical Studies.
- 20-21 April 2001 - Naples (Italy): Science and Democracy (invited) at the Italian Institute for Philosophical Studies.
- 1921 July 2000 - Dresden (Germany): 3<sup>rd</sup> European Conference on Magnetic Sensors and Actuators (EMSA).

10-12 May 1999 - Pavia (Italy): 9<sup>th</sup> International Symposium on Non-Linear Electromagnetic Systems (ISEM).  
13-15 July 1998 - Sheffield (UK): 2<sup>nd</sup> European Magnetic Sensors and Actuators Conference (EMSA).  
19-21 January 1998 - Saarbruecken (Germany): 4<sup>th</sup> PCC Meeting of MADAVIC Project (at D\*ASS mbH Laboratory for Process Automation and Saarlandes University).  
12-14 May 1997 - Braunschweig (Germany): 8<sup>th</sup> International Symposium on Non-Linear Electromagnetic Systems (ISEM).  
12-13 December 1996 - Grenoble (France): 2<sup>nd</sup> PCC Meeting of MADAVIC Project (at LEG: Lab. Eléctrotec. Grenoble).  
22-24 July 1996 - Iasi (Romania): 1<sup>st</sup> European Magnetic Sensors and Actuators Conference (EMSA).  
20-24 May 1996 - Roma (Italy): International Symposium on Metastable Mechanically Alloyed and Nanocrystalline Materials (ISMANAM).

### **PATENTS**

1. R. Germano, F. M. Sacerdoti, Identification system for textiles items based on magnetostrictive tags (Italian Patent pending: NA 2009 A 000046).
2. R. Germano, F. M. Sacerdoti, Identification system based on multiple magnetostrictive tags (Italian Patent pending: NA 2009 A 000045).
3. L. Lanotte, G. Ausanio, R. Germano, A. D'Agostino, V. Iannotti, C. Luponio, Elastomagnetic composite material, fabrication process and devices based on this material (Italian Patent nr. ITRM20020158).
4. L. Lanotte, R. Germano, A. D'Agostino, V. Iannotti, G. Ausanio, A sensor and a method for measuring static and dynamic micro-deformations (International patent nr. WO/2003/016891).
5. R. Germano, V. Elia, Method and device for the extraction of electric energy from water (Italian Patent nr. 1411927)

### **PROMETE SRL**

In 1997 I founded PROMETE Srl ([www.promete.it](http://www.promete.it)) - acronym of PROMotion of the Evolution of the TEchnology, obviously referring to the first “know-how transerrer” of Mankind: the mythical Titan Prometheus, “the foreseer”.

In 1999 PROMETE was officially recognized as **Spin off Company of the Italian National Institute for the Physics of Matter - INFN that is now incorporated in the Italian National Research Council - CNR**.

**PROMETE is one of the first Italian Research Spin off and the first one in Campania Region.**

**PROMETE Srl is Regional Research Centre for Experimental Research and Development in the Field of Physics, and it is a Quality Assured Firm - ISO 9001 for Research and Development in the field of Experimental Physics.**

PROMETE office and laboratories were located for 5 years at the Physics Department of “Federico II” University of Naples, and then, for 8 years they were placed at the BIC-Business Innovation Center of “Città della Scienza” in Naples [www.cittadellascienza.it](http://www.cittadellascienza.it), maintaining also the former location at the Physics Department.

A formal Agreement between the Italian National Institute for the Physics of Matter (I.N.F.M.) – now CNR – and PROMETE provides the use of the Institute laboratories to PROMETE for specific activities of R&D for industrial research and prototype development. PROMETE has also a formal agreement of preferential partnership with the Romanian National Institute of Research and Development for Technical Physics (Iasi, Romania) since November 2003 and a Partnership Agreement for Technology Transfer activities with Iasi County Council since May 2004.

## **PROMETE Srl main activities are:**

**Innovation and Technology Transfer, Research and Development Project Financing and Management, Commercialization and Dissemination of Innovation, Technical and Market Research Expertise on Recent Available Innovations and Technologies Dedicated to Meeting the Complex, Specific Needs of Innovation and Development of the Industry Clients, Development of Industry-Academia Partnerships at National and International Level Creating Links Between Research and Industry, Image/Data Analysis Systems.**

PROMETE has significant expertise and know-how in: Materials (e.g. Soft Magnetic and Magnetoelastic Materials, Magnetic Amorphous Materials, Magnetic Metallic Alloys, Composite Materials), Sensors (e.g. Deformation and Magnetic Field Sensors), Specific Measurements and Analysis (e.g. LabView (NI) and TREK (telescience resource kit), Image/Data Analysis, Statistic Data Analysis, Experiments Control and Automation, Atomic and Magnetic Force Microscopy, Vibrating Sample Magnetometry, SQUID (Superconducting Quantum Interference Device) Magnetometry, Crack Propagation Analysis System for Fatigue Tests in Metallic Alloys, Differential Scanning Calorimetry).

- PROMETE is a founding member of the Cooperative Credit Bank of Napoli - (BCC Napoli)

### **SOME PROMETE RESEARCH ACTIVITIES FOR CLIENTS**

*“Testing of a prototype of magnetoelastic sensor for the analysis of static deformations in concrete structures”*

Client: National Institute for the Physics of Matter

*“Technical activities for LIDAR (Light Detection And Ranging) measurements”*

Client: National Institute for the Physics of Matter

*“Production of a magnetoelastic resonator”*

Client: National Institute for the Physics of Matter

*“Preliminary study for the characterization of carbon nano-structures derived from combustion processes”*

Client: Department of Chemical Engineering, University of Naples “Federico II”

*“Realization, testing and optimization of contactless magnetoelastic wave sensors of vibrations”*

Client: National Institute for the Physics of Matter

*“AFM (Atomic Force Microscopy) study of morphological characteristics of nanometric organic structures derived from combustion processes”*

Client: Department of Chemical Engineering, University of Naples “Federico II”

*“Non Destructive Analysis by SQUID (Superconducting Quantum Interference Device) sensors on stainless steel profiles welded by electron-beam”*

Client: Consortium CREATE (Consortium for Research in the field of Energy and Technological Applications of Magnetism)

*“Realization and test of a portable LIDAR (Light Detection And Ranging) system to detect atmosphere particulate”*

Client: Consortium CO.RI.STA (Consortium for Research on Systems of Advanced Telesensors)

*“Design of an interferometric optical system to measure magnetostrictive films deformations”*

Client: National Institute for the Physics of Matter

*“Analysis of the morphological characteristics of surface defects in composite materials by Atomic Force Microscopy (AFM)”*

Client: National Institute for the Physics of Matter

*“Implementation of a Vibrating Sample Magnetometer (VSM) - (OXFORD Instruments) and of a Atomic Force Microscope (AFM) - (Lot Oriel)”*

Client: National Institute for the Physics of Matter

*“Feasibility study of a demonstrative prototype of an automation system in the field of visual inspection for NDA by penetrating liquids”*

Client: Europea Microfusioni Aerospaziali SpA (ROLLS ROYCE)

*“Automation of a system measuring magnetomechanical anomalies of metallic surfaces by SQUID sensors”*

Client: National Institute for the Physics of Matter

*“Firmware for wireless distributed instrumentation”*

Client: STRAGO Srl

"Synchronization software for devices to exchange quantum cryptography keys"

Client: ENEA - Italian National Agency for New Technologies, Energy and Sustainable Economic Development

"New system for quantitative video analysis of crack propagation"

Client: SIMITECNO Srl for ALENIA Aeronautica SpA

"Development of two different classes of getter systems: 1) Nanocomposites materials in polymeric matrix; 2) Functionalized Room Temperature Ionic Liquids (RTIL)"

Client: SAES GETTER SpA

"Experimental set-up and test for amorphous ferromagnetic tags"

Client: E-VOLUZIONE Srl

"System for atmospheric particulate sampling, by Quartz Crystal Microbalance"

Client: Europea Microfusioni Aerospaziali SpA (ROLLS ROYCE)

"Structural analytic and SW analysis for the viscoelastic structure of the pre-qualification model of Globe"

Client: TELESPAZIO SpA

### ***IN 2008 PROMETE SRL ACQUIRED 50% OF NOVAETECH SRL - THE FIRST SPIN-OFF OF THE ITALIAN NATIONAL INSTITUTE OF ASTROPHYSICS (INAF), AND IN 2015 PROMETE SOLD THE SHARE.***

Founded in 2005, Novaetech Srl collects the experience and highly specialized knowledge of its founders, scientists expert in aerospace engineering, physics and astronomy, with many years of research experience at INAF (Astronomical Observatory of Capodimonte, Naples) and partners of ASI - Italian Space Agency and ESA - European Space Agency in many scientific projects.

The company core business is the development of innovative instruments, based on high resolution and sensitivity sensors. Novaetech offers a wide range of advanced technological products and services such as: sensors and electronic devices, quartz crystal microbalances, technical-scientific services, and information technology services. Novaetech specialists have a consolidated know-how in Quartz Crystal Microbalance.

They developed the AE-QCM that is a very high precision mass measuring sensor featuring excellent performances in the recovery of the beat oscillation frequency coming from two coupled working quartz crystal.

The sensor has an integrated electronic control and it can be used standalone by interfacing to any frequency meter, oscilloscope or any kind of acquisition frequency system.

AE-QCM has different applications such as: real time monitoring of air particulate matter (PM) concentration, real time measurement of thin film deposition mass, monitoring of surface corrosion, thermogravimetric analysis, etc...
